

Your Managed Engineering Services Partner

Tough Challenges

Managing ongoing day-to-day operations within your organization that are not a part of your company's core competency can create a drain on your talent resources.

What's more, in today's marketplace you face ever-increasing pressure to:

- ▶ Launch products faster
- ▶ Incorporate processes to drive down costs
- ▶ Locate and retain specialized talent

Organizations that are able to efficiently manage all these tasks are the ones that succeed. Partnering with experienced professionals to help you meet these challenges optimizes your resources, both human and physical, enabling you to focus on your business and your bottom line

Imagine a company that can help you accomplish these goals, starting with just one phone call!

Smart Solutions

National Technical Systems has profitably managed test and engineering facilities for almost 50 years, utilizing our world-class network of engineers and Subject Matter Experts.

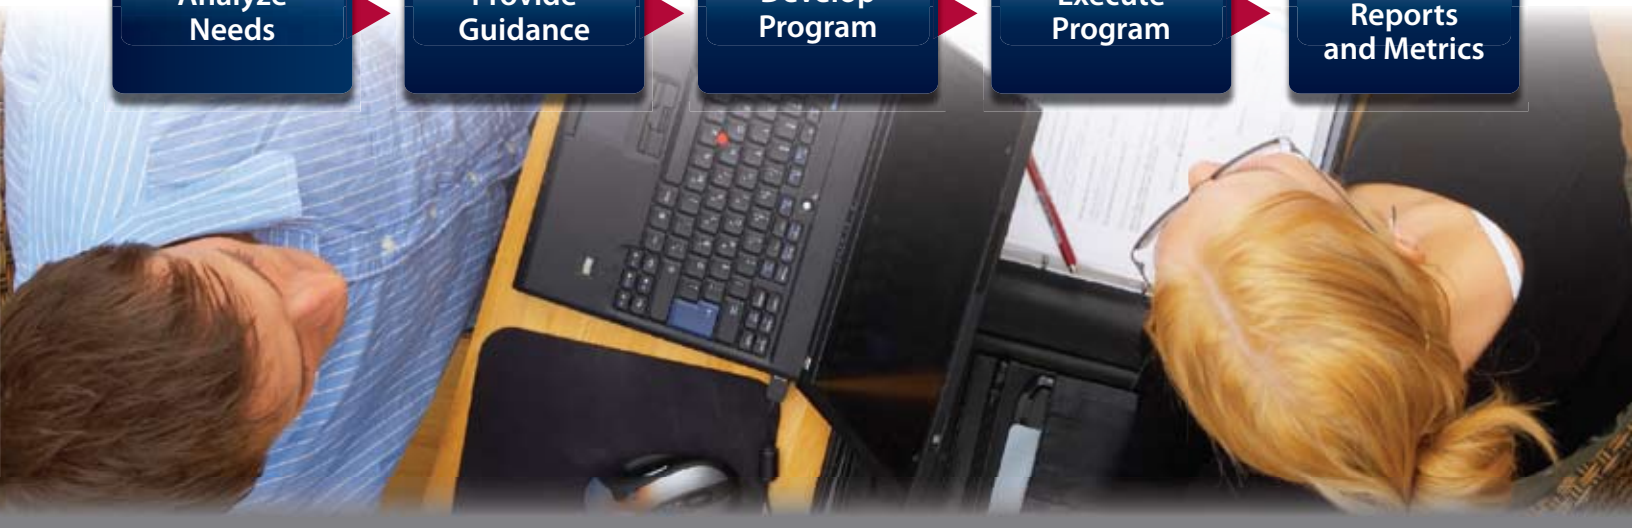

As your Managed Engineering Services partner, NTS can provide a customized, flexible integrated solution to your workflow challenges, giving you peace of mind and more time to focus on key areas of your business.

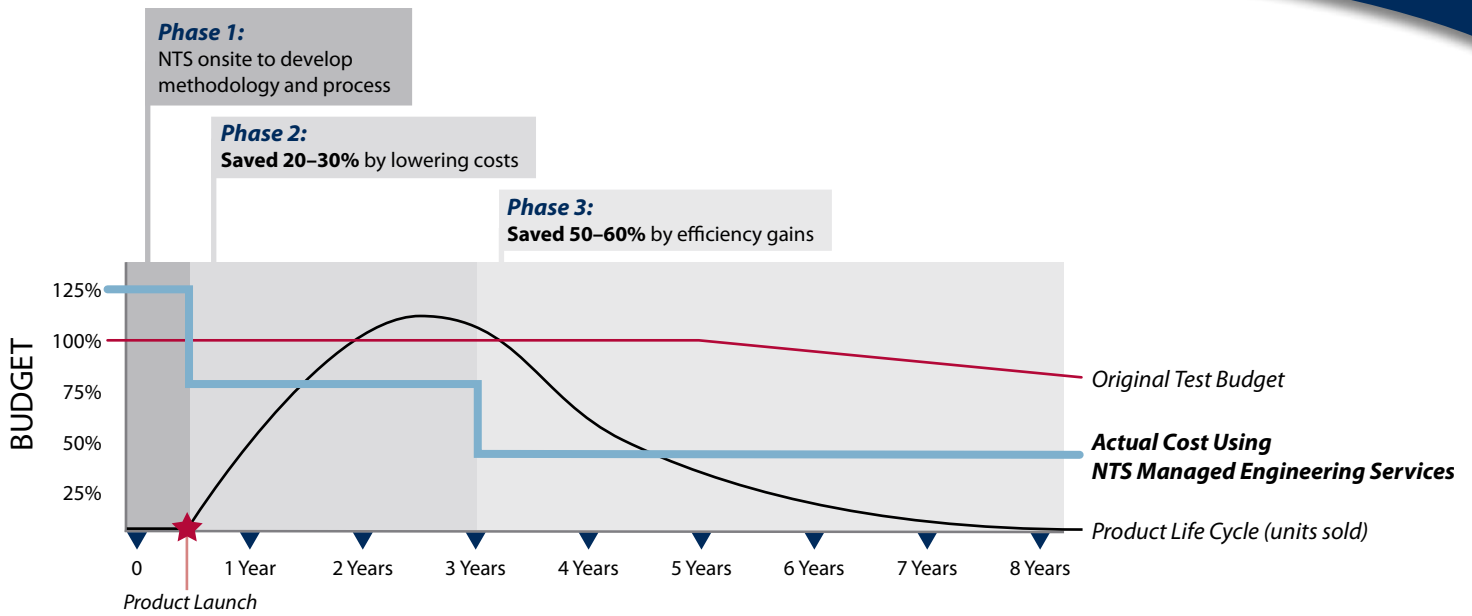

We make it happen with:

- ▶ Onsite and Offsite Teams
- ▶ Offshore Teams
- ▶ Computer Technology Testing
- ▶ EMI/EMC Testing
- ▶ Stress/Thermal Analysis
- ▶ Telecom/Broadband/Wireless Testing
- ▶ Satellite Testing

A professional Program Manager works with you to create your organization's own integrated solution. Since it is created for your organization alone, your integrated solution is designed to give you the savings and results you want. Your dedicated Program Manager is your single point of contact, backed by a team of professionals giving you a seamless, cohesive solution.

NTS's Managed Engineering Services program facilitates effective and efficient operations. You maintain overall management control of your operation.

Integrated Solutions

By involving NTS's Subject Matter Experts in the early stages of product development and incorporating test design from the inception, our clients realize significant cost savings and a higher completion of on-time market release of their products.

The above chart is an example of the savings a client can realize by taking advantage of on-site and offshore Managed Engineering Services options.

24/7 Secure Online Monitoring

As part of your integrated solution, you can monitor your program information any time day or night from anyplace in the world with LabInsight. LabInsight is a secure portal where you can download reports, review data, or even witness testing in real time. This powerful tool allows you to assess your product's progress throughout the development cycle. Even if the testing is being done offsite or offshore, you can access information as if it were happening right next door.

Accelerating Your Time to Market

Since 1961, NTS has partnered with companies in the aerospace, defense, computer technology, telecommunications, electronics, power, medical device and automotive industries. We're one of the world's largest independent standards compliance and product testing companies. We stay on top of the ever-changing world of compliance regulations so you don't have to. And we understand the importance of bringing testing into the design phase of product development.

Call NTS today at (800) 270-2516, send an email to sales@ntscorp.com or visit our Web site at www.ntscorp.com to learn more about how partnering with NTS will accelerate your time to market and free time for you to focus on your core business objectives. Our Managed Engineering Services program makes it happen.
